6. If the cross-nominated nominations using intraday PTRs exceed obtained capacity, pro-rata reduction is applied.
7. Nominations using intraday PTRs submitted in advance will be matched in the first possible pre-intraday/ intraday matching cycle.
 - a) If the result of the pre-intraday / intraday matching for given nominations after capacity check matches (fully nominated intraday PTRs), such nominations will be considered as finally matched and their status will be set to Faultless. It will not be possible to modify such nominations anymore.
 - b) If the result of the pre-intraday / intraday matching for given nominations is mismatched or relevant intraday PTRs are partially nominated, such nominations will be considered as mismatched and an Anomaly Report shall be sent out to relevant market parties. Modification of such nominations is still possible until the gate closure time of matching process for the matching time interval.

If at intraday COT nominations are not finally matched according to 5.7.a such mismatches for the matching time interval will be resolved by TSOs, automatically applying lower values or set to zero rules. Such time series are consequently set as faultless and it is not possible to modify them anymore.
8. Market participants are informed by intermediate/final CNF, Anomaly Report or Acknowledgement document about the matching results as soon as possible, but latest at the Matching COT. In case of systems unavailability market participants will be informed by phone. The type of used document depends on local market rules.
9. Market participants have to include received information in the next submission of nomination. Already submitted nominations have to be in line with the matching results from the previous cycle, otherwise they will be dismissed
10. In no event shall MAVIR and/or HOPS be liable for any loss of profit, loss of business, or any other indirect incidental, special or consequential damages of any kind.

Article 6

Format of nomination and communication

1. Nomination of cross-zonal exchange using PTRs shall follow the standards and formats in accordance with individual national rules of each of the TSOs valid at the time of delivery.
2. Communication between market participants and TSOs shall follow the standards and formats set by the TSOs available on their web sites referred to in Article 5.
